I think what your doing is wrong, and it violates my rights. You are impossiong your views and laws on me and my family when it comes to a serivce I pay for. It is very important to me to have these services when i travel. Since I handle to 3 states it is very hard for me to find a signal from local radio staions. espacial when your cutting through the mountains. Yet then again I don't think these people have ever left their cozy little city life. I can say that because I moved from NY to AZ. You try getting something good on the radio. Even in AZ you can't get good signals once you pass exit 236 on I-17. why don't you focus your attentions to some thing better like homeland security, then to what we listen to on our Xm radio. At least then we know our money is being put to go use!!!!
